Podcast SAP Developer News – Transcription October 9th, 2025

[Intro] This is the SAP Developer News for October 9th, 2025.

[Mamikee] Hi, everyone. Can you believe we're already wrapping up week two of Devtoberfest? It's been such a fun week, tons of coding, learning, and connecting with the community. But don't slow down just yet because week three is right around the corner and we've gotten some really exciting stuff planned. So if you want to find out what's coming up next, the challenges, the sessions, all the surprises, make sure to head over to the Devtoberfest group on communities.sap. This is where you'll find all updates on all the sessions that's going on. Check it out and keep earning your points. We'll see you in week three.

[Rainey] Howdy, SAP developers. If you're a user of the SAP developer tutorial system, there's an important migration that's been underway that you'll want to know about. We've been gradually migrating content from an older NetWeaver system called ES5 over to S/4HANA. And we're happy to say that that migration is largely complete today. As one of the final touches in this, Andre Fisher, a product manager for ABAP, has published a blog post outlining the decommissioning of the older system. You can click on a link below and get access to that information. Happy S4ing, folks.

[DJ] On Wednesday next week that's Wednesday the 15th of October 5pm CEST is the next installment of the CAP roundtable so it's on the horizon so I did that if you are a CAP aficionado a user a developer anybody involved in the CAP ecosphere this meeting is for you topics to discuss requirements, things to highlight, insights you want to share, then join this roundtable next Wednesday, 15th of October. See you there.

[Shrini] Hello, everybody. Are you ready for today's scavenger and clue? Today's clue is hidden right here in the Discovery Center. The SAP Discovery Center is packed with a lot of useful resources. You will find a mission catalog with missions to help you implement your use cases on SAP BTP. A guidance framework which gives you a clear and structured path with best practices and developer guide. Plus a service catalog for SAP BTP and AI services where you can check pricing, see available regions and explore the related missions. here is what to look for. In the Mission Catalog, search for the mission title, Setup Joule Studio with SAP Built in BTP Enterprise account. Once you open this mission, you will find the first three hexadecimal numbers of the clue. The next half of the clue can be found in the Architecture Center. Architecture Center was recently launched by SAP to showcase, share, and collaborate on reference solution architectures with the developers and architects. It has a sleek card style overview page. Head over to the tile named Exchange Joule with Joule's Toolbook. Once you land on the page, you might notice something out of place there. The next three hexadecimal numbers might be hiding there. As a part of fun activities for week 3, we have 4 brand new puzzles. Check it out in this blog post by Daniel. You can find links to all the resources in the description. Let us know about your hunt in the comments.
